

Abhay Pratap Singh

Bareilly, Uttar Pradesh

8299159499 | iabhay.thakur18@gmail.com | linkedin.com/in/er-aps/ | github.com/Abhay-Thakur-18

Education

Invertis University **July. 2024 – July 2027**

Bachelor of Technology in Artificial Intelligence , with a current CGPA of 8.52. *Bareilly , Utter Pradesh*

Experience

Tesseris **May 2026 – Sept 2026**

AI Product Intern

- Built an Agentic Commerce project using Google A2A, AP2, x402, and ERC-8004 protocols.
- Worked on AI agent interaction and product workflows for secure and reliable agent-based commerce.
- Contributed to an agentic system focused on trust infrastructure and communication within the agent economy.

Techiguru **Apr 2026 – Aug 2026**

Data Science / AI-ML Intern

- Worked on Python and machine learning concepts as part of practical data science projects.
- Built and evaluated machine learning models using Scikit-learn.
- Applied AI/ML concepts to solve practical problems and improve understanding of real-world data.

EduSkills **Oct 2025 – Dec 2025**

AI-ML Virtual Intern

- Completed a 10-week virtual internship focused on Artificial Intelligence and Machine Learning.
- Gained practical exposure to AI/ML concepts through internship-based learning and activities.
- Completed the internship with an A (Very Good) grade under the AICTE National Internship Portal.

Projects

Trust-Based Agent-to-Agent (Google A2A) Collaboration System **July 2026**

Python, FastAPI, Docker, REST APIs, PyNaCl, Git, GitHub

- Built a platform where multiple AI agents can find, communicate, and work with each other to complete tasks.
- Designed different services such as Client, Worker, Verifier, and Escrow to manage tasks and agent interactions.
- Added a trust and reputation system to check an agent's reliability before allowing collaboration.
- Implemented digital signatures and escrow-based payments to make agent communication and transactions more secure.

Risk Prediction of Cardiovascular Disease **April 2025**

Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Built a machine learning system that predicts the risk of cardiovascular disease using patient health-related data.
- Cleaned and prepared the dataset and selected important features for model training.
- Trained Logistic Regression and Random Forest models and compared their performance.
- Achieved 93.8 accuracy and evaluated the model using accuracy, precision, recall, and F1-score.

Technical Skills

Protocols: Google A2A , Google AP2 ,x402
Programming: Python (Advanced), SQL , C (Intermediate), Java (Basic), JavaScript, HTML/CSS
AI/ML Frameworks: Scikit-learn, TensorFlow,Flask, Pandas, NumPy, OpenCV
Tools & IDEs: Git, GitHub, Google Antigravity, Jupyter Notebook, Google Colab, VS Code, Anaconda, Docker, Postman
Visualization: Power BI, Tableau , Microso Excel, Matplotlib, Seaborn
Databases: MySQL, MongoDB
Other: AI/ML, Deep Learning, Data Analyst, FastAPI, Problem Solving .

Certifications

- AI Product Intern — Tesseris — May–September 2026
- Artificial Intelligence & Machine Learning — EduSkills Foundation
- Tata GenAI Powered Data Analytics Job Simulation — Tata / Forage
- Data Science Master Virtual Internship — EduSkills Foundation
- Python 101 for Data Science — IBM
- HackBhoomi 2025 — 3rd Place (Internal Smart India Hackathon) — Invertis University
- Generative AI for All — PhysicsWallah (PW)
